WF01 · Student Home & Explore

CONCEPT / UX01

One task at a time, meaningful recent activity, photo-led discovery. Advanced filters open below the top header; main navigation is a top collapse menu.

Lost · Gedung A

Possible match

Media, records and notifications are illustrative demo content. An item remains revisit-able; discovery interaction never submits a claim.

WF02 · Item Detail & Ownership Claim

CONCEPT / UX01

Public details stay separate from verification. Claim requires an explicit action and private proof form; the finder's identifying clue is never shown to Student.

Item Detail · mobile concept

ReFind

Menu

Choose your Lost report

Identifying detail *

Describe a private scratch, repair, contents or other identifying detail…

Private to you and authorized BM.

Ownership evidence · optional

Up to 2 supporting photos. Never public.

Add supporting photos

Updating a claim?

The review note appears here; previous answer and retained-photo count are preserved.

Submit claim for review

Pending, own-item, terminal and duplicate states replace the CTA with an explanation. Claim errors keep the draft available for correction.

WF03 · Report & My Activity

CONCEPT / UX01

One report form with clear sections and type-dependent private fields. Activity cards expose status and the next action without a wide claims table.

View read-only details

Public vs private history

Public timeline uses generic events. Pickup and review details remain authorized-only.

Student campus history uses the same read-only cards with Student top navigation.

Scheduled examples use synthetic demo data. Completion can also follow an unscheduled PENDING handover after BM confirms the physical return.

WF07 · Student Explore — desktop

CONCEPT / UX01

The same mobile-first hierarchy expands into a comfortable card grid. Search/filter stay above content; no permanent primary sidebar.
